Once Again, EQUIST!

Modern and traditional equestrianism is one of the fastest growing fields of activity in Turkiye. EQUIST continues to address horse riding and equestrianism in a holistic manner from a cultural, industrial and sportive perspective.

Urbanisation and modernity increase the longing for rural life. While living spaces are shifting out of the city, houses with gardens are becoming widespread. A new lifestyle is developing around horses and horse riding. Domestic animals, especially horses, take their place in the new way of life. Riding clubs are being established all over the country. As facilities, horses and riders increase, consumption and investments increase. In Turkiye, there is a huge market and new demand for horses and equestrianism. This great demand and the requirements of the new lifestyle are waiting for a response.

EQUIST is well known and trusted by the horse world. With a new face, EQUIST brings the horse world together.
