The evolution towards the future of the chemical industry

GLOBAL STRATEGY

Expoquimia, the international chemistry fair going back over 50 years, is evolving and presenting a new vision. After the turning point of the previous event in 2023, we're taking a step forward to reinforce the representation of the industry at home and abroad and showcase the far-reaching and significant role of Chemistry in the Process Industries.

As the only generalist trade fair in the sector in the Mediterranean arc, Expoquimia will bring together the leading companies in the market, providing an inclusive and advanced platform for interaction.

The event will be aligned with market trends and meet the present and future needs of the chemical sector and the process industries, placing particular emphasis on sustainability and efficiency.

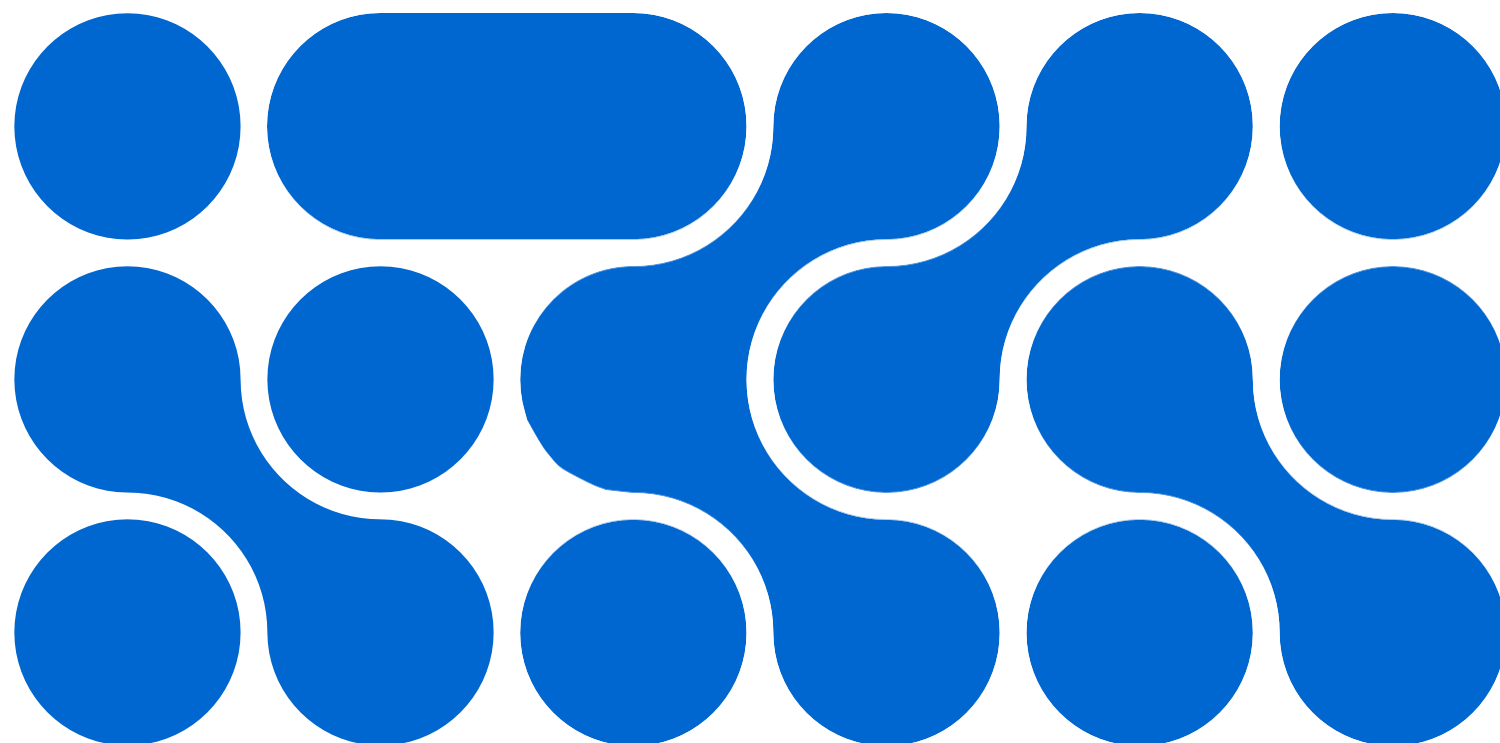

Expoquimia26, the International Chemistry and Process Industries Fair, will be held from 2 to 5 June 2026.

REPOSITIONING

OF CHEMISTRY IN THE PROCESS

We're expanding and diversifying Expoquimia in every sense, in terms of the target audience, stakeholders, technologies, collaborative opportunities, etc.

This is a shift that will allow us to position ourselves as a more innovative and versatile fair aligned with broader trends and the challenges facing the industry.

INTERNATIONAL AREA OF INTEREST: MEDITERRANEAN ARC

The Mediterranean area provides excellent opportunities for Expoquimia. Thanks to Barcelona's strategic position and the region's dynamic and diverse industrial fabric, the growth and development of the chemical sector and the process industries will be promoted in this international setting.

SHARED CHALLENGES FACING THE SECTOR

The chemical and process industries are essential for addressing some of the most urgent global challenges, including energy, agriculture and health, among many others. These industries not only provide innovative solutions for industrial processes, they also make them effective in keeping with the current sustainability and efficiency standards.

They're vital contributions to sustainable development and improving the quality of life around the world, ones that we at Expoquimia wish to highlight and share.

At Expoquimia26 we want to support the leaders of the industry to enable them to lead the change. Together we'll promote the sustainable transformation of the chemical sector and the process industries by providing solutions that allow us to address the global challenges that the future poses for us. Only in this way will we transform the industry and change the future.

**A transformational event:
growth, internationalisation and
business opportunities**

STRATEGIC PILLARS

01

**Leadership and
representativeness of the
sector**

02

**Internationality with focus:
Mediterranean arc**

03

**Evolution
and growth**

THEMATIC AXIS

THE KEY ROLE OF CHEMISTRY IN THE
“**SUSTAINABLE
INDUSTRIES**”

Expoquimia26 will focus on the sustainable transformation of industries and their processes, underlining the fundamental role of chemistry and the process industries as key drivers when it comes to addressing shared global challenges (energy and the energy transition, water management, the digital transformation, etc.).

EXPOQUIMIA '26

Historically, Expoquimia has a highly-qualified visitor profile with decision-making power.*

From 2026 onwards, it will grow in the areas of Process Engineering and other "factory" profiles, together with the traditional Chemists and Laboratory Technicians.

*Expoquimia 2023: 16% of the Managing Directors and 8% of the Area Managers in the key sectors.

2026 GOALS**LEADING COMPANIES IN KEY MARKETS
AND INTERNATIONAL GROWTH**

Expoquimia26 will attract a highly-qualified and decisive visitor profile from diversified markets and the main companies in the sector. It will be a space designed to connect with the leaders of the industry and generate business opportunities.

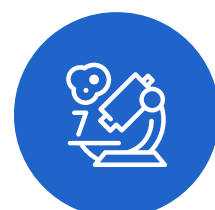

The key sectors in Chemistry and the Process Industries

Expoquimia26 will bring together the most innovative and leading companies in the Chemical and Process Industries sector, providing a broad and representative display with over 400 exhibitors.

The new strategic repositioning to expand our demand will also be reflected in the diversification of the sectors covered by the fair. Following an exercise of analysis and recategorisation, we present the key sectors set to define Expoquimia26:

Base Chemical Industry and Raw Materials

Laboratory material and analytical instrumentation

Machinery and capital goods

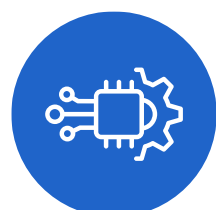

Pharma process

Pumps, valves and measurement and control

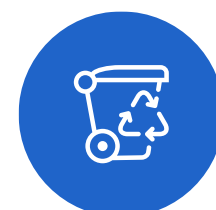

Thermal processing

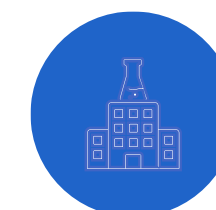

Engineering and automation

Industrial and occupational safety

Environmental technology and waste management

R&D and tech transfer research centres

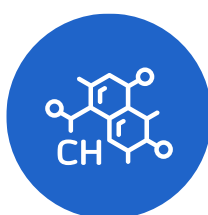

Associative fabric and ecosystem

With this solid and diverse sectoral offer, Expoquimia26 will consolidate its standing as the must-visit meeting point for the key players in Chemistry and the Process Industries, fulfilling the expectations of the 15,000-plus visitors that are expected and offering them solutions to cover the present and future needs of their companies.

WE PLACE EMPHASIS ON THE MAIN SECTORS OF THE CHEMICAL INDUSTRY

WE GENERATE OPPORTUNITIES WITH THE MOST INTERESTING AUDIENCES

Base Chemical Industry and Raw Materials

EXHIBITOR PROFILE:

- Producers of base chemicals
- Polymer manufacturers
- Petrochemical companies
- Producers of intermediate products
- Manufacturers of chemical specialities

VISITING COMPANIES:

- Chemical industry manufacturers
- Pharmaceutical industry manufacturers
- Plastic industry manufacturers
- Distributors of base chemical products and raw materials

VISITOR PROFILE:

- Purchasing managers
- Production managers
- Formulation technicians
- Product developers
- Supply chain managers

Laboratory material and analytical instrumentation

EXHIBITOR PROFILE:

- Manufacturers of analytical equipment
- Suppliers of laboratory material
- Scientific instrumentation companies
- Manufacturers of measurement systems
- Suppliers of laboratory consumables

VISITING COMPANIES:

- Chemical industry manufacturers
- Pharmaceutical industry manufacturers
- Cosmetics manufacturers
- Universities and research centres
- Distributors of laboratory material and analytical instrumentation

VISITOR PROFILE:

- Laboratory managers
- Heads of R&D
- Quality control technicians
- Researchers
- Product development managers
- Purchasing managers

Pharma process

EXHIBITOR PROFILE:

- Pharmaceutical machinery manufacturers
- Suppliers of clean room systems
- Packaging equipment companies
- Inspection system manufacturers
- Suppliers of sterilisation solutions

VISITING COMPANIES:

- Pharmaceutical industry manufacturers
- Cosmetics manufacturers
- Drug manufacturers
- Engineering and integrators
- Machinery distributors

VISITOR PROFILE:

- Pharmaceutical plant managers
- Heads of production and R&D development
- Purchasing manager
- Engineering manager
- Head of maintenance
- Validation engineers
- Quality technicians
- Pharmaceutical project managers

Pumps, valves and measurement and control

EXHIBITOR PROFILE:

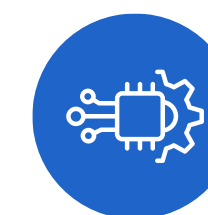

- Industrial pump manufacturers
- Producers of specialised valves
- Pipeline system companies
- Suppliers of seals and joints
- Manufacturers of fluid control instrumentation

VISITING COMPANIES:

- Chemical industry manufacturers
- Pharmaceutical industry manufacturers
- Cosmetics manufacturers
- Manufacturers of food and beverages
- Manufacturers of nutraceuticals
- Manufacturers in the iron and steel industry
- Manufacturers in the textile industry
- Manufacturers of paint and coatings
- Manufacturers of semiconductors
- Distributors of pumps, valves and components
- Integrators and engineers

VISITOR PROFILE:

- Process engineers
- Heads of maintenance
- Plant technicians
- Industrial purchasers
- Engineering consultants
- Production managers

Engineering and automation

EXHIBITOR PROFILE:

- Industrial process engineering companies
- Manufacturers of control and automation systems
- Suppliers of industrial robotics solutions
- Industrial software developers
- System integrators

VISITING COMPANIES:

- Chemical industry manufacturers
- Pharmaceutical industry manufacturers
- Cosmetics manufacturers
- Manufacturers of food and beverages
- Manufacturers of nutraceuticals
- Manufacturers in the iron and steel industry
- Manufacturers in the textile industry
- Manufacturers of paint and coatings
- Manufacturers of semiconductors

VISITOR PROFILE:

- Production and operation managers
- Heads of industrial maintenance
- Process engineers
- Technical managers
- Heads of continuous improvement
- Site managers

WE PLACE EMPHASIS ON THE MAIN SECTORS OF THE CHEMICAL INDUSTRY

WE GENERATE OPPORTUNITIES WITH THE MOST INTERESTING AUDIENCES

Machinery and capital goods

EXHIBITOR PROFILE:

- Reactor and mixer manufacturers
- Filtration system suppliers
- Processing equipment companies
- Manufacturers of complete production lines
- Dosing system companies

VISITING COMPANIES:

- Chemical industry manufacturers
- Pharmaceutical industry manufacturers cosmetic manufacturers
- Food and beverage manufacturers
- Nutraceutical manufacturers
- Iron and steel industry manufacturers
- Textile industry manufacturers
- Paint and coating manufacturers
- Semiconductor manufacturers
- Distributors of machinery and capital goods
- Integrators and Engineering

VISITOR PROFILE:

- Plant managers
- Industrial purchasing managers
- Production engineers
- Technical consultants
- Managers of new projects

Thermal processing

EXHIBITOR PROFILE:

- Heat exchanger manufacturers
- Suppliers of industrial ovens
- Refrigeration system companies
- Industrial boiler manufacturers
- Specialists in thermal insulation

VISITING COMPANIES:

- Chemical industry manufacturers
- Pharmaceutical industry manufacturers
- Cosmetic manufacturers
- Food and beverage manufacturers
- Nutraceutical manufacturers
- Iron and steel industry manufacturers
- Textile industry manufacturers
- Paint and coating manufacturers
- Semiconductor manufacturers
- Distributors of machinery and capital goods
- Integrators and Engineering

VISITOR PROFILE:

- Engineering directors
- Energy managers
- Process technicians
- Maintenance managers
- Industrial consultants

Industrial and occupational safety

EXHIBITOR PROFILE:

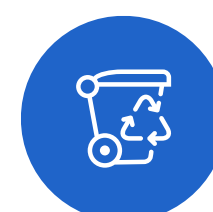

- PPE manufacturers
- Security system providers
- Gas detection companies
- Prevention consultants
- Manufacturers of emergency equipment

VISITING COMPANIES:

- Chemical industry manufacturers
- Pharmaceutical industry manufacturers
- Cosmetic manufacturers
- Food and beverage manufacturers
- Nutraceutical manufacturers
- Iron and steel industry manufacturers
- Textile industry manufacturers
- Paint and coating manufacturers
- Semiconductor manufacturers
- Distributors of industrial and occupational safety equipment and materials

VISITOR PROFILE:

- Those responsible for prevention
- Security technicians
- Occupational risk coordinators
- Plant managers
- Purchasing directors
- Maintenance managers

Environmental technology and waste management

EXHIBITOR PROFILE:

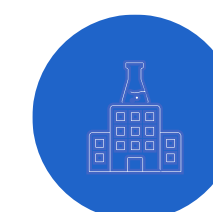

- Waste treatment companies
- Manufacturers of purification equipment
- Clean technology providers
- Environmental consultants
- Industrial recycling companies

VISITING COMPANIES:

- Chemical industry manufacturers
- Pharmaceutical industry manufacturers
- Cosmetic manufacturers
- Food and beverage manufacturers
- Nutraceutical manufacturers
- Iron and steel industry manufacturers
- Textile industry manufacturers
- Paint and coating manufacturers
- Semiconductor manufacturers
- Engineering and integrators

VISITOR PROFILE:

- Environmental managers
- Waste managers
- Sustainability technicians
- Plant managers
- Environmental consultants

R&D and tech transfer research centres

EXHIBITOR PROFILE:

- Technology centers
- Universities
- Science parks
- Research institutes
- Technology transfer centers

VISITING COMPANIES:

- Chemical industry manufacturers
- Pharmaceutical industry manufacturers
- Cosmetic manufacturers
- Food and beverage manufacturers
- Nutraceutical manufacturers
- Iron and steel industry manufacturers
- Textile industry manufacturers
- Paint and coating manufacturers
- Semiconductor manufacturers
- Engineering and integrators

VISITOR PROFILE:

- R&D directors
- Industrial researchers
- Innovation managers
- Product developers
- Technological project managers

**Industry Showcase: the
knowledge area that gives a
voice to the key players in the
industry**

INDUSTRY
SHOWCASE

BEST
IN CLASS

For the second time in a row, Expoquimia26 will organise the Industry Showcase area, designed to give a voice to representatives of the sectors that use chemical solutions and, from this fair onwards, the process industries. This space seeks to highlight real experiences and display the results of the application of specific innovations.

Following the success in 2023, when 25 sessions featuring 53 speakers and over 700 attendees were held, Expoquimia26 will once again present this space to promote knowledge and excellence and address the global challenges facing the industry.

Moreover, the new Best in Class project will highlight four first-rate domestic projects selected for their dedication, their prominence and their transformational role in the chemistry and process industry sectors.

EXPOQUIMIA '26

THEMATIC PILLARS OF THE INDUSTRY SHOWCASE

1. Energy and energy transition.

Sessions to reveal how the process industries are adapting to the energy challenges of the future, placing emphasis on decarbonisation and the integration of renewable energy sources.

2. Industrial water and sustainable management of water resources.

Solutions and innovations in water management for the chemical and process industries, focusing on sustainability and efficiency.

3. Materials and ingredients for the production process.

We place value on innovation in materials and ingredients to ensure efficient, sustainable and competitive production processes, with particular emphasis on the recovery of by-products and new opportunities for the circular economy.

4. The digital transformation and technological innovation.

We cover how digitisation and the emerging technologies are transforming the process industry. With a special focus on the implementation of technologies in industrial

New in 2026: Internationalisation programme

International Programme

We'll present a new internationalisation programme at Expoquimia26, designed to promote the presence in previously selected strategic markets of participating companies with a desire to export and foster new business opportunities.

This programme will be held in an exclusive area in order to:

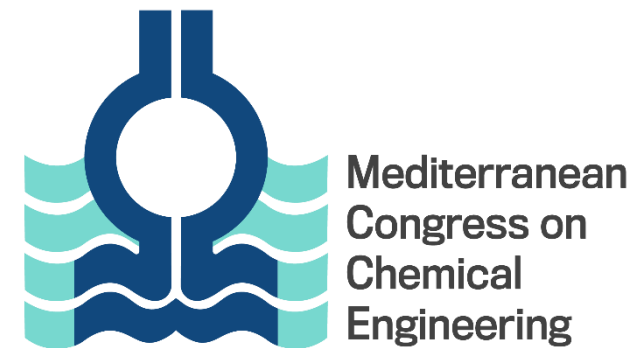

Detect
opportunities and schedule meetings between exhibitors and international visitors

Promote
cooperation and exchanges of knowledge between different countries and key regions for the chemical and process industries.

With specific activities focused on global expansion and opening up to new markets, this programme will become the meeting point for everyone seeking opportunities beyond the national boundaries and international visitors to the fair.

Reference framework for the key events in the sector

MECCE CONGRESS

Following the success of the previous event attended by almost 300 scientists, researchers and professionals from industrial companies, to which over 200 abstracts were submitted, Expoquimia26 will host the 16th Mediterranean Congress of Chemical Engineering (MECCE).

With Dr Rosa Nomen (AIQS) retaining the presidency, the Congress will be held from 2 to 4 June 2026, with the aim of presenting the solutions developed by chemical engineers from around the world to enable the industrial sectors to achieve the ambitious goals of the United Nations 2030 Agenda.

SMART CHEMISTRY, SMART FUTURE.

Within the framework of Expoquimia26, this space for debate, promoted by FEIQUE, will once again be a key event for showcasing the progress made in innovative technologies and processes to contribute to achieving the objectives of the European Green Deal for 2050.

At this fair, Smart Chemistry, Smart Future will present a wide range of events focused on how the chemical sector is continuing to lead the development of technological solutions and disruptive processes.

The Smart Chemistry, Smart Future Agora will debate vital issues for a sustainable future...

**... including circularity,
decarbonisation, energy efficiency and
cutting-edge technologies such as green
hydrogen, carbon capture, vehicle batteries
and new sustainable production processes,
among many others.**

Organised by:

Engineers Day: the value of engineers in the development of the industry

ENGINEERS DAY

Welcome creators of tomorrow

In partnership with the EIC (Engineers' Association of Catalonia), Expoquimia26 will present Engineers Day, an event devoted to highlighting the crucial presence of engineers in the chemical and process industry, playing a key role in innovation, sustainability and the development of industrial processes.

Enginyers
Industrials de Catalunya

Engineers Day will address some of the most important challenges faced by engineers in the chemical sector and the process industries, exploring new technological solutions, success stories and opportunities for cooperation.

AIMS OF ENGINEERS DAY

- To highlight the role of the collective in the development of the chemical and process industry.
- To attract a technical and decision-making visitor profile to Expoquimia26, made up of engineers and professionals from different industrial disciplines.
- To generate a space for exchanging knowledge about the challenges they face on a daily basis by means of some of the most innovative solutions.
- To facilitate networking and collaboration between professionals from the collective and the sector.

The Engineers Day initiative encourages the attendance of a technical, qualified and decision-making audience in search of innovative solutions to optimise the industrial processes of their companies at Expoquimia26.

Gala Dinner: the big night for the chemical industry

Gala DINNER

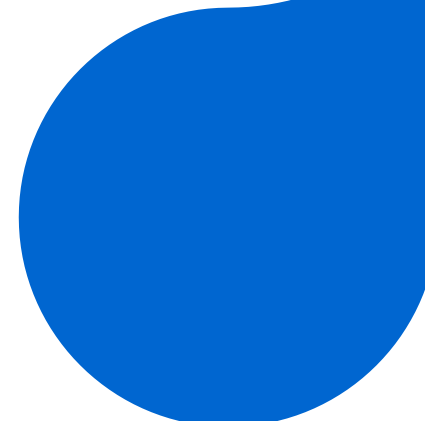

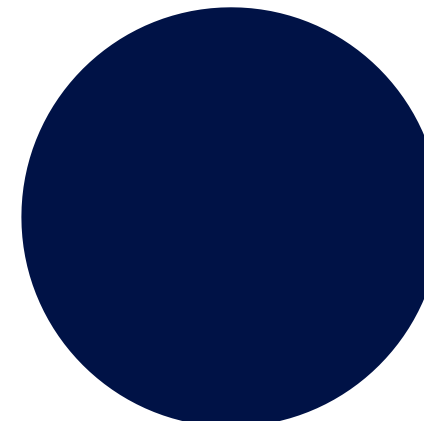

At Expoquimia26 the Gala Dinner will once again bring together the leading entrepreneurs and executives in the chemical industry, as well as prominent figures from the institutional, social and economic spheres.

This exclusive event for 700 people will allow the companies and organisations to invite their most important customers and stakeholders.

Well-established as a prestigious public relations event, following the success of the 2023 dinner bringing together 600 people, Expoquimia26 will once again provide a unique opportunity to highlight the importance of a key industry which supplies 98% of the productive sectors and plays a crucial role in sustainable development.

EXPOQUIMIA '26

The event will take place on **3 June 2026** in the emblematic **Oval Room of the MNAC (Museu Nacional d'Art de Catalunya)** in Barcelona and feature the participation of executives from the main companies and associations in the chemical and process industry, promoting networking at the highest level.

The event will include an intervention by **Ilham Kadri**, the current president of the **European Chemical Industry Council (Cefic)** and the CEO of **Syensqo** (formerly Solvay) as a guest speaker.

Furthermore, the **Best in Class** awards will be handed out during the evening to recognise the four most innovative and transformational projects from different industrial sectors, which will be presented at the **Industry Showcase** during the fair.

We invite you to attend the only social event of this importance in the country. **The Expoquimia 2026 Gala Dinner is the ideal opportunity to raise the profile of your company, invite your customers, expand your network of contacts and achieve high-impact brand visibility.**

Side Events, alongside our partners

SIDE EVENTS

Expoquimia26 will once again promote the organisation of varied activities and sessions by leading entities linked to the chemical and process industry.

The consolidation
of the leading
fair in the
industry.

EQUIPLAST

Encuentro Internacional
del Plástico y el Caucho

Alongside Expoquimia, Equiplast will return in 2026 as the flagship event for the plastic and rubber value chain, highlighting strategic synergies with companies in the chemical sector in key areas for the industry.

Equiplast 2026 is the leading meeting point for the plastic and rubber industry in Spain, with an ecosystem featuring over 3,400 processing companies for multiple key sectors such as packaging, automotive and construction, among many others.

This fair will bring together all the main players in plastic and rubber to showcase innovative and sustainable solutions that address the global challenges involving the environmental impact.

Over the course of four days, Equiplast will become the epicentre of the latest innovation and circular economy solutions, with the goal of accelerating the transformation towards a more sustainable future.

Reasons for taking part

1

Valuable connection with the Chemical and Process Industry.

Join the main leaders, companies and key players in the chemical sector set to meet at Expoquimia26 to share and debate the present and future of the industry. Taking part will allow you to form part of this transformation and position yourself as a benchmark in the sector.

2

Space for unique knowledge.

Make the most of highly valuable activities such as the **Industry Showcase** and the **internationalisation programme**, designed to give a voice to companies in the sector and share experiences and innovative solutions and address global challenges together.

3

High-level visibility for your company.

The **Gala Dinner** and other exclusive events provide an ideal opportunity to increase the visibility of your company in a privileged environment. Connect with high-level stakeholders and enhance your reputation as a key player in the chemical and industrial field.

4

Business opportunities with your customers.

Expoquimia26 is a platform for connecting with your customers. Qualified visitors and key decision-makers will come to learn more about your company's innovative and sustainable solutions, establish strategic alliances and develop new business opportunities.

5

Trends in innovation and sustainability.

Forming part of Expoquimia26 means aligning yourself with innovation and a commitment to sustainability. The activities and solutions presented at the fair will seek to lead the transition towards a more responsible and efficient chemical industry.

6

Synergies with Equiplast26.

Thanks to the partnership with **Equiplast**, Expoquimia facilitates the connection with other key sectors such as the plastics industry, creating an environment conducive to establishing synergies and enhancing the reach of your company in different application markets.

7

And, above all, an Expoquimia created WITH THE SECTOR.

Expoquimia26 is being developed in partnership with companies, associations and key entities in the sector in order to ensure that the event is aligned with the needs and expectations of the entire industry. Taking part means forming part of a fair jointly designed with the most important players in the ecosystem, actively contributing to the future of the sector.
